SUMMARY

Computer Science student at the University of South Carolina with hands-on experience in **software engineering**, **full-stack development**, and **AI training**. Built and deployed applications using **Java**, **Python**, **TypeScript**, **React**, **Express.js**, and **Firebase**, with experience developing REST APIs, evaluating frontier LLMs, and working across collaborative software development workflows.

EDUCATION

University of South Carolina | B.S. Computer Science

August 2024 – December 2027

GPA: 3.799

Columbia, SC

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Computer Networks, Computer Architecture, UNIX/Linux Fundamentals, Discrete Structures

TECHNICAL SKILLS

Languages: Java, Python, C, C++, TypeScript, JavaScript

Frontend: React, HTML, CSS, Tailwind CSS

Backend & APIs: Express.js, Node.js, REST APIs

Cloud & Databases: Firebase

Tools & Platforms: Git, GitHub, GitHub Actions (CI/CD), Linux/Unix

Frameworks & Libraries: JUnit, JavaFX, GSAP, Framer Motion

Core Concepts: Data Structures & Algorithms

PROJECTS

ATSify – Full-Stack AI Resume Scanner

May 2026 – Present

[Live Demo](#) | [GitHub](#) | [React](#), [TypeScript](#), [Gemini](#), [Firebase](#), [Express](#)

- Developed and deployed a full-stack resume analysis platform using **React**, **TypeScript**, **Express.js**, **Firebase**, and **REST APIs**, supporting **100+** resume analyses across **20+** test users and generating **50+** ATS compatibility reports.
- Engineered a custom NLP pipeline with TF-IDF scoring, stop-word filtering, n-gram extraction, a **650-line** skills taxonomy, and a **247-line** synonym map.
- Integrated Gemini structured JSON output with a **90-line** schema to detect missing skills, weak bullets, formatting risks, and quantified achievement gaps across **6** simulated ATS platforms.
- Documented system architecture and API workflows across resume parsing, scoring, and report-generation pipelines.

Developer Portfolio

March 2026 – Present

[Live Demo](#) | [GitHub Pages](#) | [GitHub](#) | [React.js](#), [TypeScript](#), [Tailwind CSS](#), [GSAP](#), [EmailJS](#) framework

- Built and deployed a responsive portfolio using **React 18** and **TypeScript**, achieving **91 Accessibility** and **91 SEO** scores on PageSpeed Insights with a **1.2s** Largest Contentful Paint (LCP).
- Implemented smooth scroll-triggered animations using **GSAP**, **Framer Motion**, and **Locomotive Scroll**, improving the overall presentation of projects and experience.
- Integrated **EmailJS** contact form with real-time success/error handling, enabling direct communication without backend infrastructure.

Infinite Stress Loop – Java Escape Room Game

October 2025 – December 2025

[GitHub](#) | [Java](#) | [Git](#) | [Scrum](#) | [Software Engineering](#)

- Developed a time-based escape room game in **Java** featuring interactive puzzles, inventory management, avatar customization, achievements, a leaderboard, and dynamic hint penalties tied to the countdown timer.
- Collaborated through the full **software development lifecycle (SDLC)** using **Scrum** and **Git**, coordinating iterative development, version control, code sharing, testing, and team integration.
- Designed modular front-end and back-end components to separate user interface behavior from game-state, timing, inventory, and progression logic, improving code organization and maintainability.

EXPERIENCE

AI Training Data Specialist - Software Engineering/Coding Domain

June 2026 – Present

[Handshake AI](#)

Remote

- Evaluated and scored frontier LLM responses on software engineering tasks using a structured rubric across dimensions including technical clarity, helpfulness, tone, and response quality, contributing production-grade human feedback data to improve AI coding assistants.
- Authored structured **Python** and **TypeScript** goal prompts targeting specific workflows across **19** macOS productivity applications to train multimodal AI agents, completing **50+** tasks across **2** concurrent projects.
- Maintained scoring consistency and inter-rater agreement across **25+** hours per week, passing calibration screening before contributing to production data pipelines.

Manager

August 2023 – Present

Exxon Gas Station

Columbia, SC

- Improved customer satisfaction by increasing store ratings from **3.0** to **4.5** stars across **70+** reviews through consistent service standards and issue resolution.
- Managed relationships and delivery coordination across **15–20** vendors, securing preferred pricing and maintaining consistent inventory availability while minimizing supply disruptions.
- Engineered an automated inventory tracking workflow using digital logs, reducing stock discrepancies by **25%** and ensuring timely replenishment of key products.
